Model: 1BBUFBURN1

Universal Magnetic Chafing Dish Heater, Square, fits full size chafers
Magnetic Chafing Dish Heater

Heat up the SAVING\$!

Each Magnetic Chafing Dish Heater replaces an estimated 5,000 cans of chafer fuel. So, over the average life of a Magnetic Chafing Dish Heater, you can save over \$6,000 in canned fuel costs! One Magnetic Heater only cost \$0.05 per hour to operate! At an average cost of \$1.25 per can of fuel that burns for 2 hours, 2 cans per chafer, you can eliminate thousands of dollars in fuel costs each year.

Heat your chafing dishes FASTER and more reliably than canned fuel. This heater heats water to 140 to 160 degrees in 15 minutes. When placed on high, the heater can boil the water in the water pan (220 deg).

The patented magnetic electric heater attaches magnetically to the bottom of the water pan on virtually any full size chafing dish from standard economy chafers to high end roll tops. The adjustable electric heat controller allows you to maintain a steady, consistent heat and unaffected by wind, room temperature etc.

Operating Costs

- Made from heavy gauge polished stainless steel
- Less hazardous to use (no open flames)
- Only one unit per chafing dish is needed
- Limited 1 year warranty against factory defects or workmanship

Do you serve a hot continental breakfast with at least 2 chafing dishes every day of the week? Replace your canned fuel with our Magnetic Chafing Dish Heater and save over \$750 in operating costs per year for EACH Chafing Dish! That's a saving of \$1500 per year - and that's just for breakfast!

Also accommodates steam tables, warming boxes, hot dog carts, and more.
